Contagion Effect: Sector Spreads vs Bank (Financial) Risk Benchmark

Monthly Spread by Sectors in Jun '26: Telecoms is most expensive Contagion

Risk Tier (Credit Rating)

Rating_Buckets

High Yield

Investment Grade

A systematic shock to the **Financial benchmark** (+30 bps drifts from Mar '26) triggered correlated risk spillover across the broader portfolio. **Telecoms** shows the highest contagion beta (for both High Yield & Investment Grade), peaking at 509 bps spread, implying a severe premium over insulated sectors like **Healthcare**. Cross-filtering by Risk Tier indicates High Yield debt absorbed the brunt of this systemic repricing.
